

Arts Media & Entertainment

Industry Sector Programs Offered by MDCP

“CAMP (Computer and Media Pathway) has allowed me to explore a lot of new paths that I never realized were possible. It has helped me realize that my dream is to work in this field. My aspiration is to go to LA Film School and become a film director. Without CAMP, I wouldn’t have direction.”

— A. GARCIA

In MDCP, the Arts, Media & Entertainment programs focus on Design, Visual and Media Arts, Performing Arts, Production and Managerial Arts and Game Design and Integration. These pathways are predominantly focused on conveying to students the interdependent management skills required to thrive in a project-based environment and encouraging the use of their artistic imagination. Students must also possess technical skills and understand the newest technology to advance into their chosen profession, postsecondary education, graduate training, or apprenticeship. Through the manipulation of

sight, sound, and motion, those choosing a pathway from this sector reach out in unique ways to enhance the quality of life for those around them.

MDCP and Victor Valley College have utilized AME students for videography, design and marketing needs.

Students from these programs compete in a variety of events through SkillsUSA and regularly earn Gold, Silver, and Bronze medals in the AME sector.
