## Lucerne Valley Unified School District

Lucerne Valley Unified School District (LVUSD) serves students living in the eastern rural area of the High Desert. Lucerne Valley is a tight-knit community, still maintaining the small town feel from years past, which is evident in our school system as well.

CTE courses encourage and empower our students to explore and build on their skills and interests, as well as define a direction for which to pursue a career. Lucerne Valley offers courses in six different industry sector pathways, including Manufacturing and Agriculture, which are important industries in the local community. Students who take CTE courses know they are working towards a variety of lucrative career options that will allow them to build a strong future and raise a family locally.

With such a broad array of educational opportunities, students can acquire knowledge from highly trained professional teachers in classrooms and laboratories, as well as, from

industry partners that will open their doors to field trips, job shadowing and internships.

LVUSD takes pride in the opportunities they offer students because, "It's more than a district, it's a family."

### HIGHLIGHTS

All of Lucerne Valley High School science courses are integrated with the FFA Program so all students participate in a CTE pathway starting their Freshman year of high school.

Lucerne Valley offers 6 Industry Sectors with 10 distinct Pathways

Lucerne Valley offers courses articulated with Victor Valley College

Lucerne Valley offers students the opportunity to partake in Precision Exams and the State Food Handlers Card.
